

Australian-made home lifts with local expertise

80+

**years of combined
lift industry experience**

Architectural concept only.
Not a completed City VT installation.

Our management team brings more than 80 years of combined experience across the commercial and domestic lift industry. We bring that knowledge to every conversation, helping clients make informed decisions about their lift, their property and their project.

What we deliver

Australian-made home lifts

Modular lift solutions for new homes and suitable renovations, supporting Australian manufacturing and local jobs.

Coordinated installation

Off-site preparation and crane-in placement, with site readiness, building interfaces and installation scope planned around your project.

Practical local expertise

Advice on lift selection, layout, access and project requirements for homeowners, builders and architects in Adelaide and Melbourne.

A clear point of contact

Personal service from the initial enquiry through planning and handover, with clear communication about scope, responsibilities and ongoing support arrangements.

Discuss your project

Send us your plans, suburb and access requirements. We will help you explore a suitable lift solution for your home or development.
